

## WIRELESS DIGITAL CLOCKS

Pyramid's full line of wireless digital clocks can be set up in a matter of a few hours. The proven industry standard 915MHz radio frequency delivers a dependable wireless synchronized clock signal in almost any vertical market. The clocks feature bright red, blue, or green LED digits for high visibility in large rooms or long hallways. Clocks are available in a variety of sizes ranging from 2.5" to 4" and 4 to 6 digits with second indicator. They provide years of maintenance-free service for a variety of environments.

Pyramid's **Digital Wireless Clocks** are ideal for facility renovation, retrofit design, and new construction applications. Since the clocks receive their radio time frequency from a Pyramid TimeTrax Sync Transmitter, they will stay on time virtually anywhere throughout your facility.

With the central time source being captured from GPS, NTP and/or the facility's internal network, it makes for a universal system almost anywhere. And, with no FCC license needed, it is the most simple to use plug-and-play installation system on the market. Not to be confused with an Atomic Clock.

- **Perfect for large areas – bright LED digits are viewable up to 160-feet**
- **Dual-sided clock mount available with wall or ceiling brackets (bracket sold separately)**
- **Simple installation, low-maintenance wireless clock synchronization**
- **Modern, thin and low profile styling for the best look in all facilities**
- **5-year manufacturer's limited warranty**

**Pyramid**
