

**1 WATT WIRELESS RF TRANSMITTERS**

A trusted name in the timing business since 1969, Pyramid is known for its expertly engineered clocks and time and attendance solutions for businesses of all sizes and from a variety of industries. Pyramid has developed a full line of synchronized wireless system clocks and transmitters that can be set up in a matter of a few hours.

The proven industry standard 915MHz radio frequency transmitter delivers a dependable wireless synchronized clock signal in almost any vertical market. It is ideally suited for standalone corporate/industrial buildings, healthcare locations, K-12 school systems, or facility renovation, retrofit design, and new construction applications. Since the clocks receive their radio time frequency from a **Pyramid TimeTrax Sync Transmitter**, they will stay on time virtually anywhere throughout your facility. With the central time source being captured from GPS, NTP and/or the facility's internal network, it makes for a universal system almost anywhere.

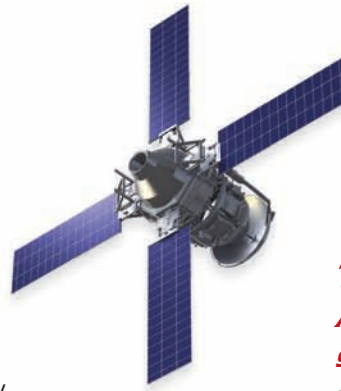

The Pyramid Wireless RF Transmitter can interface with a full line of Pyramid Time and Attendance payroll management systems. In addition, the transmitter can synchronize your networked phone system, networked servers, networked PCs, and existing wired synchronized clock systems with bells and horns (such as a Simplex system). With no FCC license needed, it is the most simple to use plug-and-play installation system on the market. Not to be confused with an Atomic Clock.

- **Low-cost solution for corporate settings, schools, healthcare, or standalone industrial buildings**
- **Capable of transmitting wireless RF synchronization signal every 10 seconds to Pyramid's Wireless Clocks**
- **128 channel 902–928MHz frequency-hopping technology**
- **Steel construction, microprocessor-based with no fans**
- **5-year manufacturer's limited warranty**

**Pyramid**  
*Time Keeping Made Simple*

# Pyramid TimeTraxsync

**TimeTrax Sync . . .  
A totally integrated  
solution from one  
manufacturer.**

## 1 Watt Wireless RF Transmitters

- 128 channel 902–928MHz frequency-hopping technology
- 1 watt output power
- Capable of transmitting wireless RF synchronization signal every 10 seconds to Pyramid's Wireless Clocks
- Send RF time signal to an unlimited number of clocks
- Field interfacing with other existing clock and sound systems
- Internal clock and LED display for clear and accurate readout
- Microprocessor based
- 5" box top antenna – No external antenna needed
- Time source captured from GPS, NTP and/or internal Network
- Can serve as an NTP time source
- Sturdy steel case housing for quick installation and longevity
- Battery back up for maintenance-free use should power fail
- Made in the USA

WIRELESS ANALOG CLOCKS

WIRELESS DIGITAL CLOCKS

**Completely manage  
your facility's time.**

Sync transmitter time to these  
other wired networked items.

## Warranty:

**5-year manufacturer's limited warranty** with free product replacement. Extended service/support and warranties are available through Pyramid.

## Specifications:

- Item Weight: 4.3 lbs. (1.950kg)  
 Item Dimensions: 2.5" H x 14" W x 8.25" D  
 (6.35 cm x 35.56 cm x 20.95 cm)  
 Required Voltage: Universal 50/60Hz 100-240VAC
