

LCD BATTERY OPERATED WIRELESS DIGITAL CLOCKS

Pyramid **LCD Battery Operated Wireless Digital Clocks** provide synchronized time using battery power rather than electricity. This makes them a great solution when digital clocks need to be located in places where running electrical wiring would be difficult or costly. As part of the Pyramid TimeTrax Sync Wireless Clock System, the clocks receive the time signal from the Pyramid wireless transmitter – no climbing a ladder to adjust the time for daylight savings or power outages.

Pyramid **LCD Battery Operated Wireless Digital Clocks** are easy to install and easy to operate. Simply install the two 3.6 volt lithium batteries, and attach to the wall (optional security bracket available). The two batteries give the clock an extra long life of 5 to 10 years, making it a long time before service is needed. The digital clocks feature an energy efficient LCD display with bright gray digits for high visibility. The clear concise numbers are 2.5" high and there are 6 digits, including the second indicator.

Pyramid **LCD Battery Operated Wireless Clocks** are part of the Pyramid TimeTrax Sync Wireless Synchronized clock system. They receive the time signal from a Pyramid wireless transmitter. The Pyramid wireless transmitter utilized frequency-hopping technology to find an open channel and broadcast in the 902MHz to 928MHz frequency range to provide the best communication to the wireless clocks. The software driven system allows you to choose NTP, GPS or an internal time source. The Pyramid Wireless Clock System is easy to operate, requires no FCC license and comes with a 5 year warranty.

- **Battery operated for use in locations without electricity**
- **High visibility LCD screen for energy efficiency**
- **Synchronizes time with Pyramid TimeTrax Sync Wireless Clock System**
- **Simple installation, low-maintenance wireless clock synchronization**
- **5-year manufacturer's limited warranty**

Pyramid TimeTrax^{sync}

LCD Battery Operated Wireless Digital Clocks

- Operates using two 3.6 volt lithium batteries
- LCD digital display with 6 digits
- 12 or 24 hour clock display
- Compatible with Pyramid TimeTrax Sync Wireless Clock System
- Time of day can be received via Pyramid wireless transmitter or BCD input
- Capable of receiving wireless RF synchronization signal every 20 seconds from Pyramid's Wireless RF Transmitter
- 128 channel 902-928MHz frequency-hopping technology
- Clock face is tinted for reducing glare
- Durable ABS frame and shatterproof polycarbonate lens
- Extremely rigid body construction designed for durability and long life
- Tamper-proof mounting bracket (optional)
- Made in the USA

Warranty:

5-year manufacturer's limited warranty with free product replacement.

DIMENSIONS OF LCD WIRELESS CLOCK

Specifications:

Item Weight: 2.5" – 6 Digit 1.5 lbs. (0.680kg)

Item

Dimensions: 2.5" – 6 Digit 4.5" H x 11.12" W x 1.44" D
(11.43 cm x 28.24 cm x 3.65 cm)

Voltage: Battery operated

Accessories:

Lithium Battery	42224
Chrome Wire Guard	42316
Weather Cover	XXXXX
